HOW A STUDENT MOVES THROUGH MOJO'S

Every person lives in **one place** — the Flight Desk — and sits on **exactly one list** at a time. Recording a payment is what moves them to the next list, automatically. Click any name, anywhere, to open their profile.

1 Website form

Someone fills out the **Book an Intro Day** or **Reserve** form at mojosflightschool.com/intro.

- Name, email, phone, location
- Lands in Flight Desk instantly

OR: + STUDENT BUTTON

2 Leads

Everyone interested. We have their name, email and phone.

- Send the branded **Intro invite** email
- Older than 6 months → Lead Archive

✓ INTRO PAID?

3 Intros Done

Paid for & did their Intro Day — hasn't signed up for training yet.

- Mark **Intro Paid** → moves here
- Follow up to enroll

✓ FULL COURSE PAID?

4 Active Students

Mark **Full Course Paid** ($3,000 unlimited) or Day Rate → they become a student. Tap their status to move them along:

- Kiting / Ground Work
- Close to First Flight
- Flying — Building Hours
- Almost Finished
- On Hold

5 Graduates

Finished training with their USPPA PPG1 & PPG2 ratings.

- Tap 🎓 **Graduate** on their profile
- They keep flying with us — weekly fly-ins for life

Along the way, in training

- **Ground School** — 2 Zoom sessions. Mark session 1, then session 2 = finished (0/2 → 1/2 → ✓).
- **First Flight** — check "Has flown", add the photo & date.
- ⭐ **Newest Pilot** — from their profile, put them on the website homepage (first name only).

Made a mistake? Undo it

- The small **×** on a student or lead moves them **back one step** (Students → Intros Done → Leads).
- Every payment can be edited or deleted on the profile.
- "Not interested" leads go to the **Lead Archive** — never lost, still searchable.

Find anyone in seconds

- **Search box** (top of the sidebar, or Ctrl K) finds any person or gear sale.
- Click a name anywhere — lists, orders, reminders, RSVPs — to open their **profile**.
- Each person is on **one list only**, so nobody gets double-counted.

EVERYTHING CONNECTS TO THE STUDENT

THE STUDENT PROFILE IS THE HUB

Whatever you record — a payment, a gear order, a quote, ground school, a first flight — is saved to that person's profile **and** shows up in its own list. Enter it once; it appears everywhere it belongs.

💵 Payments

Intro Paid? · **Full Course Paid?** · **+ Payment**. Cash, Venmo, Zelle, card… Each one adds to **Total spent** and moves the person to the right list.

🛒 Student Orders

Sales → Student Orders → **+ New Student Order**: pick who's placing it, pick the student, enter the gear, price, paid with and date.

→ Saved on their profile **and** in the Student Orders list (with "Placed by").

🧾 Quotes

+ Quote builds a gear quote with sales & aviation tax, emails it to the student, and tracks it: Draft → Sent → **Purchased**. Old quotes can be archived.

TATE HELMS

✉ email ☎ phone

ADDED · INTRO · ENROLLED · GROUND SCHOOL · FIRST FLIGHT

ACTIVE STUDENT · CLOSE TO FIRST FLIGHT

TOTAL SPENT

$3,250

- ✓ Intro Paid
- ✓ Full Course Paid
- ✓ Gear Purchased
- ½ Ground School 1/2
- + Payment · + Quote
- ⭐ Newest Pilot

Contact · status · stage · dates · ground school · first flight photo · notes · payments & purchases · gear quotes

📈 Training status

Stage picker (Kiting → Close to First Flight → Flying → Almost Finished → On Hold), Wheel Launch, Has flown. Changes update every count on the dashboard instantly.

📚 Ground School

Two sessions: **1/2** after the first, ✓ **finished** after the second. Shows on the profile, in lists, and next to names on ground school RSVPs.

🪂 First Flight & Newest Pilot

Add the photo and date, tap ⭐ **Newest Pilot** → they appear in the homepage slider with a congratulations message.

Example: A student buys a wing → **+ New Student Order** → choose **Mike** (placing it) → pick **Tate Helms** → "APCO F5 wing", $3,627, Cash → **Add**. It now shows on Tate's profile under Payments & Purchases, raises his Total Spent, checks ✓ Gear Purchased, and appears in **Sales → Student Orders** and the Sales card on Home.

TRAINING DAYS, WEATHER & INSTRUCTORS

RUNNING TRAINING

Training days come straight from our GroupMe chats, so nobody types anything twice. Weather tells us which evenings are worth showing up for, and instructors log their days from the dashboard or their phone.

1 Check the weather

Weather button (Home) or Training → Weather.

- Toggle **Monarch** (Mocksville) / **Laney's Airport** (Maiden)
- 7 days of wind, gusts, gust factor, winds aloft, temperature, rain chance, sunset
- Each evening rated **Great · Good · Marginal · No-fly**, plus the **best day this week**
- Link to the full ppg.report

2 Announce in GroupMe

Post the day in **Mojo's – Mocksville** (Monarch) or **Mojo's – Laneys** (Laney's), or use **+ Training Day** on Home — it posts the RSVP event for you.

- Flight Desk checks GroupMe automatically
- "↻ Check GroupMe" forces a refresh

3 Training Schedule

Each day shows **who's going** (from RSVPs & replies) and the **gear to bring**:

- Wings = school-gear students + 2 spares
- Motor — if anyone close to / past first flight
- Trikes for wheel-launch students
- Past days collapse into a history list

📚 Ground School

Usually Tue & Thu on Zoom. **+ Schedule Ground School** posts the RSVP event to **both** GroupMe chats. "Who still needs ground school" lists everyone with 0/2 or 1/2 sessions — mark each session as they attend.

📋 Log Attendance

Instructors log every **field day** (pick name + field) or **other hours** (gear work, intros, admin, events — with what you did). From the red **Log Attendance** pop-up, or on a phone at **mojosflightschool.com/log**.

📊 View Attendance

Training → Instructor Attendance shows each instructor's field days this quarter, with percentages. Every 6 hours of other work counts as one attendance day. Pick past quarters from the menu.

SALES, SCHOOL GEAR & STAYING ON TOP OF THINGS

SALES, ORDERS & THE TO-DO LIST

The Sales section separates what **students** buy from what the **school** buys. The To-Do List on Home is where the team keeps track of everything else — and the dashboard adds automatic reminders from the data.

Student Orders

Gear students buy through us. **+ New Student Order** → who placed it, student, gear, price, paid with, date. Saved to the student's profile. Year filter (this year by default, older years archived), search, and totals.

School Orders

Gear **we** buy from dealers for the school — motors, kiting wings, risers, parts. **+ New School Order** → who's ordering, item, dealer, category, qty, cost. Track it **Ordered → Shipped → Received**; received orders move to Past orders.

Quotes

Build a quote for any student or customer (taxes included), email it, and mark it **Purchased** or **Not interested**. Gear Pricing on Home opens the APCO, Kangook and MacFly dealer sheets.

✅ To-Do List (Home, bottom left)

- Type it in and press **Add** — everyone on the team sees the same list
- Check it off when it's done (shows who finished it and when) · ✕ removes it
- **View all** opens the full page: drag ⠿ or use ▲▼ to put the most important on top, add a person and a due date (overdue turns red)

🔔 Automatic Reminders (Home, bottom right)

- Leads waiting on an intro invite
- Students missing a phone or email
- Students who still need ground school
- Students who haven't flown yet

✓ **Done** hides one until its number goes up.
